

TROY Checkwriting Software - Corporate Edition

Take control of the way your company prints checks and enhance security at the same time. Using TROY Checkwriting Software - Corporate Edition, a Windows-based laser check printing software package, you are able to create checks in a secure and cost-effective manner.

Whether you print ten checks a month or hundreds of checks a day, TROY Checkwriting Software - Corporate Edition will streamline your payment process. Compatible with most financial software systems, TROY Checkwriting Software - Corporate Edition merges accounting information with pre-configured electronic check templates and prints checks exactly how you want onto blank security check paper. Simply import data from your existing accounts payable or payroll system and TROY Checkwriting Software - Corporate Edition does the rest - complete with MICR characters (the numbers found on the bottom of checks), secured amount fonts, and encrypted digital signatures.

Benefits

- Control who has access to the check printing process
- Eliminate worries about blank checks getting into the wrong hands
- Configure and layout an unlimited number of bank accounts and check styles
- No longer need to order checks for multiple accounts.

Technology

- Integrates seamlessly with popular accounting and payroll software packages
- TROY Checkwriting Software - Corporate Edition has an intuitive and easy-to-use interface
- TROY printers feature both operational safeguards and security enhancements

TROY Checkwriting Software - Corporate Edition Advantage

- Superior protection from fraud and theft with multi-layered security features
- Improved productivity through distributed printing
- Costs of preprinted check stock eliminated
- Expanded flexibility with on-demand scheduling of print production
- Check processing time reduced with load balanced printing
- Maximum operational flexibility with multiple printer support
- Intelligent paper handling – overflow pages can be sent to a separate tray

TROY CHECKWRITING SOFTWARE - CORPORATE EDITION - THE ONLY CHECK PROCESSING SOLUTION YOUR COMPANY NEEDS

TROY Checkwriting Software - Corporate Edition cuts overhead and operational expenses by:

- Reducing supplies costs by eliminating the need for separate checks for multiple accounts. Blank check stock can be used for any of the company accounts.
- Providing the capability to print checks with TROY Checkwriting Software - Corporate Edition automatically, allowing unattended check printing.
- Allowing changes to be made to account information at any time, thus eliminating the need to purchase new checks when details change.
- Streamlining the process of check printing, signing, bursting and decollating into a single step.
- Minimizing wasted stock by printing overflow pages onto plain paper from a different tray or printer.

TROY Checkwriting Software - Corporate Edition sets the standard in security features with:

- **Positive Pay** - creates a reference file that is used by your bank to ensure that only authorized checks are cashed.
- **Multi-level Signature Limits** - TROY Checkwriting Software - Corporate Edition facilitates one, two or no signature(s) on a check depending on user-configurable signing limits.
- **Digital Signature Encryption** - to prevent unauthorized usage, all signatures are encrypted and can only be used by the TROY Checkwriting Software - Corporate Edition. Activation of signatures with a signature card and magnetic card reader are optional for additional security.
- **Fully Customizable Operator Privileges** - management can configure operator privileges and control account access (e.g. A/P, Payroll), check signing privileges, etc.
- **Physical Security** - a USB key prevents unauthorized usage of the software. Software access and check printing is impossible without the unique USB key.
- **Built-In Reporting** - Audit and Archive Reporting provides information (including: check amount, number, date, payee name, and the user that printed the check run) based upon either the current batch of checks being printed or historical information.

Optional software modules:

- **ManualChecks** - allow users to generate manual checks independent of the financial software system - an excellent solution for checks that need to be printed immediately.
- **Reconciliation** - allows users to keep track of outstanding checks by manually adding "Clear" or "Void" flags to check records, or automatically by importing an electronic check file.
